

🕹 innus D

Diagnostic measurement by "Gold-Standard" at both Femur and Spine

medical ECONET

inus D A

- Easy to operate by intuitive software
- Comprehensive report by issuing T- and Z-Score
- Short testing time of ca. 2 minutes per scan area
- · Low radiation of patient and operator thanks to to pencil beam
- Specifically designed forsmall spaces
- FRAX®
- Pediatric Mode

System					
X-ray Source	DEXA (Dual Energy X - ray Absorptiometry)				
Scanning	Pencil beam				
Performance					
Scan Site	Spine L1-L4, Dual Femur, Forearm				
Scan Type	Non-Stop Scan				
Scan Time Fast	L1 - L4 ca. 1,5 minutes; Femur ca. 1 minute				
Scan Time Normal	L1 - L4 ca. 3 minutes; Femur ca. 2 minute				
Accuracy	<1%				
Measured Parameters	BMD/BMC/Area/tissue thickness				
Calibration	automatic calibration, daily QC phantom				
Patient Positioning	laser aid positioning (Plus Shape Type)				
Image Transmission	DICOM				
Environmental Conditions					
Operating Temperature	15-40°C				
Humidity	20-80%				
Operating Voltage	AC 220V - 240V, 50 / 60 Hz				
System Requirements					
Operating System	Win 7/10 (PC included)				
Monitor	LCD Monitor (1280 x 1024 pixels)				
Printer	Color ink jet				
Dimensions & Weight					
Weight	130,5 kg				
Dimensions	1900 x 800 x 1210 mm (Full Size)				
Electrical Safety					
Classification	Class I, Type B				

Dimensions

1900 x 800 x 1210 mm, ca. 131 kg
